

Barrier Panel System

HAWK TECHNOLOGY LTD.

Going Beyond Everyday

Hawk Technology Ltd has evolved with today's manufacturing requirements by planning, designing, building and installing state-of-the-art robotic integration and tooling solutions around the world. Whether it is one piece of tooling or an entire manufacturing facility, our highly knowledgeable and experienced staff works with our clients to exceed industry standards by providing the best in design, program management, and manufacturing services.

Our entire team is committed to forming strategic partnerships with clients requiring total technical and manufacturing services. With access to everything we need under one roof – design, fabrication, engineering, service and more – we can respond to our clients' needs every day.

We challenge ourselves to go beyond the minimum and add value to our solutions, our process and our deliverables. Hawk Technology Ltd is the One Source for Integrated Manufacturing Solutions.

Barrier Panel System

We manufacture and export a comprehensive range of products that are produced using the latest technology. Our products are globally accepted for their exceptional quality, sophisticated engineering and high efficiency.

All of our products are the results of our clients needs and our commitment to manage all of aspects of our business under one roof and provide true turn-key solutions for our clients.

Our world class design and fabrication capabilities are client driven with their needs and their budget in mind. Our approach gives us the control in all our deliverables including design, quality and costs to ensure our innovations and solutions go beyond the expected every day.

Hawk Technology has developed a Barrier Panel System manufactured from a self-extinguishing polymer working great in welding, machining, and assembly environments.

Our system consists of polymer panels, floor mounted steel framework and LH or RH doors in 3' and 6' widths with optional electronic safety switch.

Our standard systems come in 6 ft, 9 ft and 12 ft heights. They come in four colors; black, blue, red and green. Clear, tinted and laser glass window panels are also available.

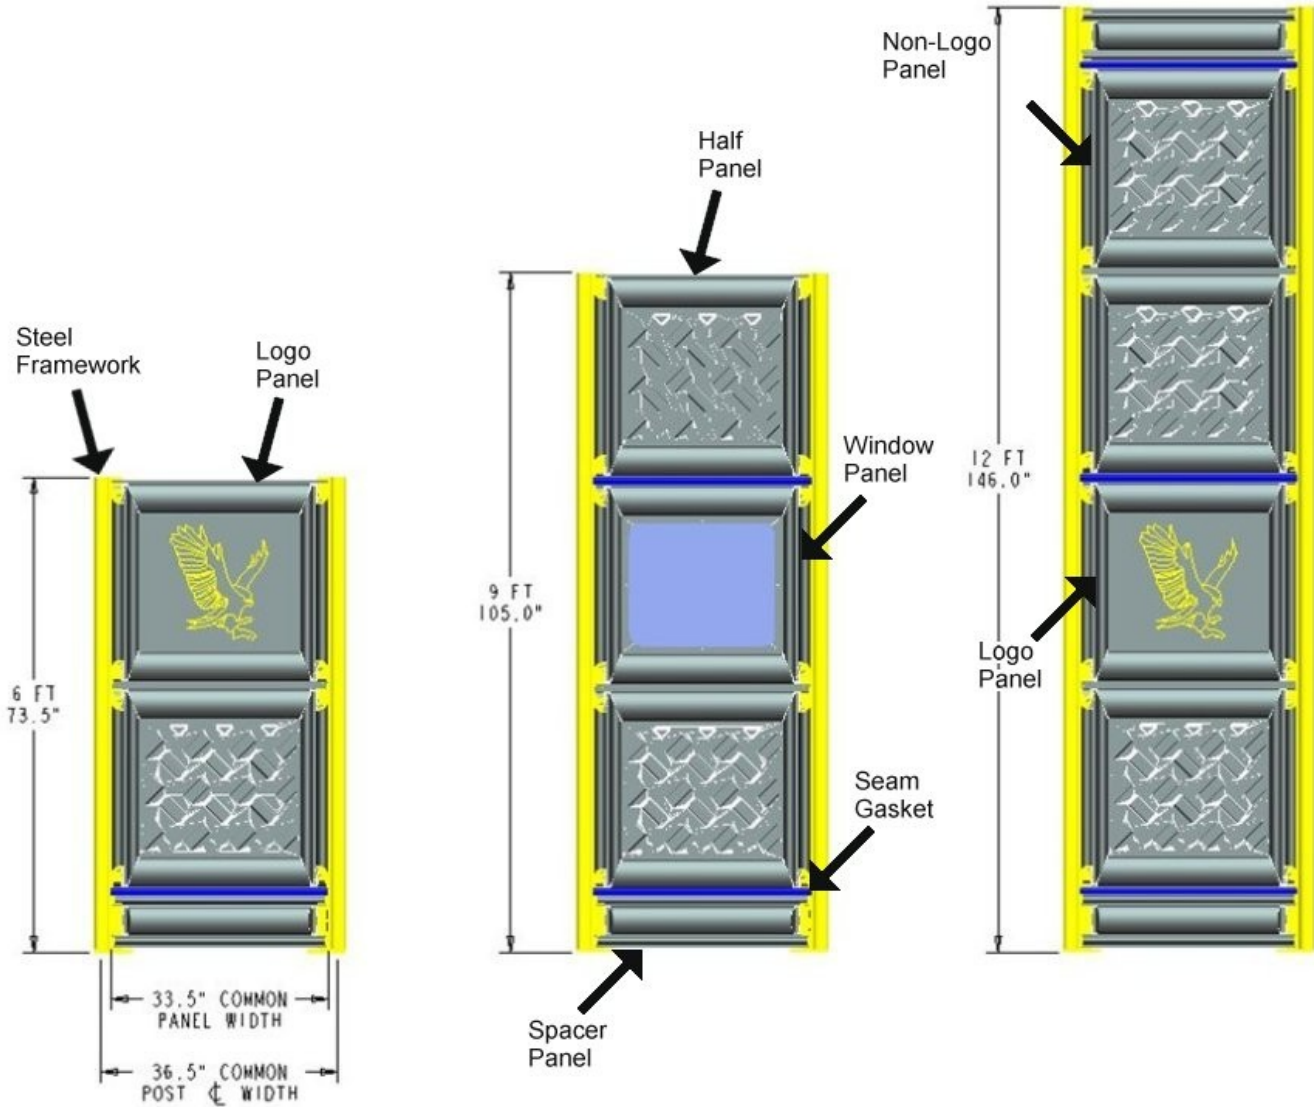

Specialized panel logos and colors can be provided.

Let us custom design your barrier panel system to match your needs.

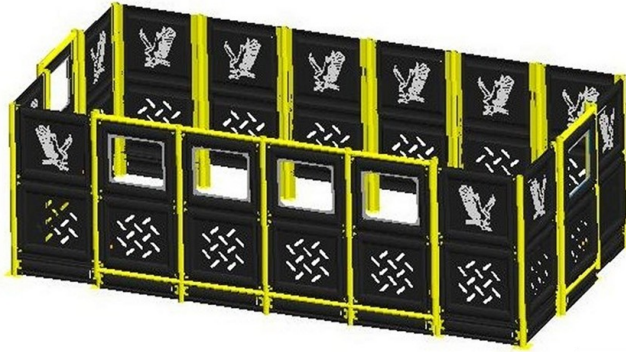

Need a customized panel system, we can help. Call us for additional information and current pricing.
